

Minutes of the site-visit under ITB-KYR-08-2015
“Supply of equipment to stream the plenary sessions of the Parliament of Kyrgyz Republic
in Internet and on television”

Date: 27.10.2015

Place: The Parliament of Kyrgyz Republic

Participants:

from OSCE

- 3 OSCE CIB representatives

from potential bidders:

- Representative of a potential bidder.

The following issues were raised and subsequent clarifications were issued:

The representative of potential bidder viewed the dislocation of the currently functioning, recording and processing system.

The representative of potential bidder asked following questions:

Q: What is the number and type of cameras to be installed?

A:, As indicated in the technical specification, 3 cameras.

Q: Will the new cameras replace the existing one, namely the one which is now installed on the back wall in the plenary hall.

A: Yes, one new camera will replace the existing one camera; two other cameras will be installed in front of the plenary hall according to the scheme in the technical specification.

Q: Where is the Director room located?

A: The room was shown to the potential bidder.

Q: How the Director’s room and the cameras will be connected. Where the cables will have to be lined?

A: Connection will be made via cables. There is a ventilation shaft which provides the opportunity to line the cables, connecting the plenary hall, director’s room, and other relevant rooms.

Q: What type of audio-video synthesizing unit is needed?

A: All the details are included in the technical specification.
