

Amendment No. 1 for RFQ/SKP/589155 - Supply and Delivery of the Toyota Highlander, Hybrid or Toyota Camry for the OSCE Mission to Skopje

Due to the fact that Toyota Europe has not promulgated a formal release date for the Toyota Highlander (Hybrid) in Europe or issued price lists to Toyota Dealers, and number of recipients of the previous tender dossier including Buk Auto have commented they cannot make an offer for the Highlander as they cannot be certain that Toyota Europe will promulgate the prices before the tender deadline.

So to ensure the Mission can utilize these funds and provide a new vehicle for our HoM as per CAPEX, we have simply added a second lot to include a Toyota Camry Hybrid, which is a vehicle with availability, and despite the OMMC recommendation that Missions buy the Aveniss as a HoMs vehicle this decision is way out of date as the Avensis model ceased production in 2018, hence the Camry is a suitable and comparable alternative.

This revised RFQ is to ensure the Mission can issue a PO for a new vehicle during 2020.

There was also a correction of a minor typo on the KW of the Highlander in the TS.
