Clarification Note # 1

Request for Quotations (RFQ) No. PR 696998 - Development of ICT solution for automatic systematisation of the data related to Supreme Court of Ukraine processing its caseload and provision of associated services on installation, training and warranty support
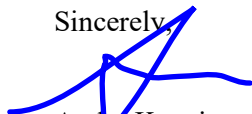

In accordance with issued RFQ No. PR 696998 - Development of ICT solution for automatic systematisation of the data related to Supreme Court of Ukraine processing its caseload and provision of associated services on installation, training and warranty support, the OSCE would like to provide the following clarification to the RFQ Documents:

**Question 1:** It is specified that the system must be developed using the MySQL + PHP stack. Our solution utilizes more modern technologies, including Python, JavaScript, and PostgreSQL. Is there an option to inquire whether the MySQL + PHP stack is a strict requirement?

**Answer 1:** The suggested option is acceptable.

Sincerely,

André Koenigs,
Administrative Officer,
OSCE Support Programme for Ukraine
